

LUNG CANCER ALLIANCE

WHAT WE DO

- Offer personalized support, information and referral services at no cost through a team of trained, dedicated staff members to help patients, their loved ones and those at risk.
- Advocate for increased lung cancer research funding and equitable access, coverage and reimbursement for screening, treatment, diagnostics and testing.
- Conduct nationwide education campaigns about the disease, risk and early detection.

SAVING LIVES AND ADVANCING
RESEARCH BY EMPOWERING
THOSE LIVING WITH AND AT
RISK FOR LUNG CANCER.

GUIDES

Grief and Understanding in Death and End-of-Life Support

If someone you love has end stage lung cancer or has passed away and you need support and guidance through the process, we can help.

Our GUIDES program provides one-to-one telephone support as you help your loved one through end of life or as you grieve.

Through this program, you will be matched with a trained GUIDES volunteer who is:

- Personalized to you based on your relationship with your loved one
- Supportive and compassionate to your needs
- Able to relate to you wherever you are in the end of life or grieving process

GUIDES volunteers keep all information confidential and will provide support throughout your journey.

For more information and to be connected with a GUIDE call our toll-free HelpLine:
1-800-298-2436 or
email: support@lungcanceralliance.org.
